WELCOME TO KARS

The Village of Kars is nestled along the shore of the Rideau River in the section known as the Long Reach, meaning the longest stretch of the Rideau Canal uninterrupted by locks. First settled in the 1820s, local industry consisted of lumbering, mixed farming and cheese making.

Construction of the Rideau Canal and a large local wharf to accommodate steamboat transportation opened the area up to people and greater prosperity.

Although its proximity to Ottawa’s urban area has attracted newer subdivisions, Kars has protected many of its heritage buildings with official designations.
